FOREIGN NATIONS AND THE FAIR

NOW that Germany has followed the example of England and Russia in declining to participate in the San Francisco exposition there will doubtless be another outburst from the press of the Pacific coast. It was to be expected that that section of the country would regret the refusal of the European governments deepty, for it will vastly diminish the glory of their enterprise. but it is both foolish and in bad taste for them to show ill temper.

There is no real reason for charging that Great Britain's refusal is an outgrowth of the controversy over Panama canal tolls. At any rate that explanation cannot be applied in the cases of Germany and Russia. or in that of Austria-Hungary which has intimated that it will also decline the invitation. Indeed, it is altogether probable that the reason given is the true one namely. that the cost of adequate representation at the fair would be disproportionate to the commercial benefits to be expected.

It should be remembered that the San Francisco fair is to be held in a section of the country which is sparsely pop-valed, as compared with the East, and that the attendance cannot possibly measure up to more than a fraction of that reached at Chicago in 1893 or at St. Louis to years later. The commercial benefits which will rocine to exhibitors will be correspondingly limited. There is no doubt that the fair will be a magnificent spectacle and as such a success, but its promoters can scarcely blame the Europeans for asking how they are to get a return on the millions they are

RE-ENTER HARRY THAW

WHETHER or not Harry Thaw is really insane is a question which probably interests very few people. The general werdict is that he night to be kept in confinement for life anyway, not only because he deliberatels killed a man, but because he affords every evidence of being an extremely dangerous citizen. The alienists say that he has a form of insanity which is liable. for cause him to commit violence at any time, and if this is so he ought to be kept in imprisonment as a preventive measure. If he is not insane he deserves the same fate as a punishment for murder.

It seems to be agreed that even if Thaw is caught he cannot be returned to the assingmounters he is found in New York state, which is scarcely likely to happen. This certainly is a curious loophole in the - law. for the Marsland's teste had to be hauled out on dog sleds and then freighted down a river in light-draft barges.

The thing needed in Alaska is the adoption of a governmental policy whereby its immense natural resources, especially coal, can be developed. Under the present system everything is tied up, and the people can scarcely mine enough fuel even for domestic purposes. Congress requires the Navy Department to spend extravagant sums shipping its fuel from the Atlantic to the Pacific, but it continues to ignore the Alaskan coal fields which could casily supply not only the Navy but the entire Paeific Slope. And it is for this reason that the largest and richest outlying possession for the United States is practically undevel-

CONGRESS AT WORK

18 obedience to the President's insistence that no adjournment be taken until the business of the session is finished, Congress has sent back home for its winter clothes and regretfully given up all hope of a vacation. The next election is still fifteen months away but the Democrats must make good, and unless they do it in this session their opponents will be able to find an immense amount of campaign material in their failure.

The tariff bill is far from being finished though months of weary debate have been devoted to it. The currency bill has only just been reported out of committee, and a brisk fight against it is promised. Under the head of foreign relations there is enough work to keep the lawmakers busy until snow flies the Mexican crisis, the proposed Nicaraguan treaty, and the dispute with England over the canal treaty, not to mention the still unsettled Japanese affair. And finally, the entertaining Colonel Mulhall is not vet disposed of. After all, there are better things than being a Congressman during a continuous hot-weather session.

AN AN I-TAMMANY FUND

THE announcement by Governor Sulzer's newspaper organ in Albany that a "national committee is to be formed to raise a monster fund to aid in his fight against Tammany" will be received with broad smiles. No doubt nine-tenths of the people everywhere sympathize with Sulver in his contest with Murphy, but they do dot sympathy with his misuse of campaign funds last fall. We can already hear the flood of sarcastic queries that will greet the announce. Aent of a Sulzer subscription fund

"Will he invest in Wall Street?" "What slocks will he buy with it?" etc., etc.

Again, even if Sulzer had not leen discredited there would be small charge of raising such a fund. People in New York are interested in Tammany or ought to he - and a few of them might be persuaded to contribute a little money to support a fight against it. But the people of the nation never! Their interest in the purification of New York politics is merely academic. They would be willing to see Murphy downed if it could be done without cost to themselves. Otherwise they are content to watch the present cat-and-dog fight at a distance.

Have You Seen the New Six-Three Kodaks?

The purpose of the SIX THREE KODAKS is to supply those who want the full anastigmat advantages of definition, flatness of field and speed, at the minimum of expense, with suitably equipped and reliable cameras.

This lens has been specially designed for this par tigular use by the makers of the well known Cooke Anas tigmat Lenses. It is an anastigmat of the very first quality, fully corrected for definition and flatness of field; and working at a speed of f. 6.3. The shutter is the regular Compound, but operated with antinous release instead of bulb and tube.

The price for post card size is \$50.00. You must come to us for the new ones.
